

GEORGE FULLER

WEB DEVELOPER & DESIGNER

HELLO

I'm George, a Web Developer & Designer based in Hertford, Hertfordshire.

I have worked both freelance and at various companies over the years, starting off my career in graphic design then later moving into web design & development.

Having been a Graphic Designer in the past has greatly benefited me in creating websites. Not only do they work great but they also look great!

I proudly create these responsive websites with my proficient knowledge in HTML, CSS / SCSS, jQuery, Bootstrap 5 & PHP, whether that be static websites or more complex websites in WordPress with my custom theme development skills. I use BitBucket with MAMP for my local environment.

I am proficient working with the Adobe suite, mainly within Adobe Illustrator and Photoshop. I use Figma to share & collaborate on my website designs & builds.

I have also had a wealth of experience creating engaging email campaigns using plain HTML & CSS as well as using MailChimp, among other emailers.

I am keen to continue learning via online courses to the betterment of myself and my skills.

WORK EXPERIENCE

Evil Donkey | 2017 - Present Web Developer & Designer

I started at Evil Donkey as a Front-End Web Developer and Designer. My responsibilities included; the design of websites using Adobe Photoshop and Illustrator and front-end HTML/CSS amends working closely with the backend & full-stack developers. After two years, I was building both the front and back-end of custom WordPress themes working with HTML, SCSS and jQuery for front-end work and then PHP and a collection of useful plugins including Advanced Custom Fields & Contact Form 7 for WordPress back-end work. Although I work for Evil Donkey today as a Full Stack Developer, working on both the back and front-end, I have always enjoyed and excelled more at the design and front-end development of our websites, the most. Going forward into my next role, I would like to focus more on these areas.

Reference number: 07966 031710

Cariad Marketing | 2014 - 2017 Graphic Designer

I started out at Cariad Marketing as a Graphic Designer Apprentice to assist the Web Developer in graphic design and helpdesk tasks. After a year of hard work I was responsible for most of the design work across all our clients. My job role was split between first-line website / email support and graphic design.

Reference number: 07506 607717

Alchemy Creations | 2013 - 2014 Apprentice Graphic Designer

Working alongside two managing directors allowed me to experience working on my own list of clients. This helped split the workload tenfold. We worked on creating the print content for various football programmes (magazines) which were handed out at championship and league two level football matches. I also got my experience in creating business cards, logos, leaflets and various other print materials working here.
